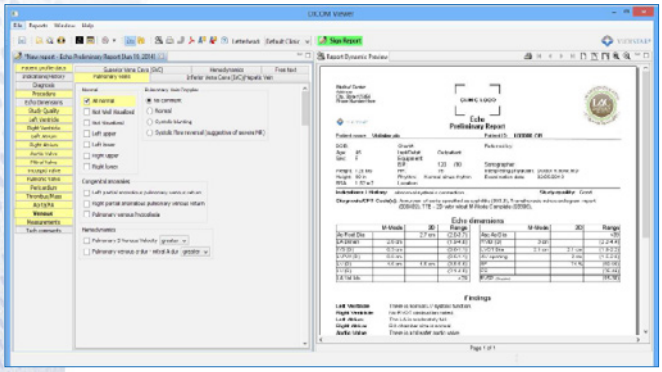
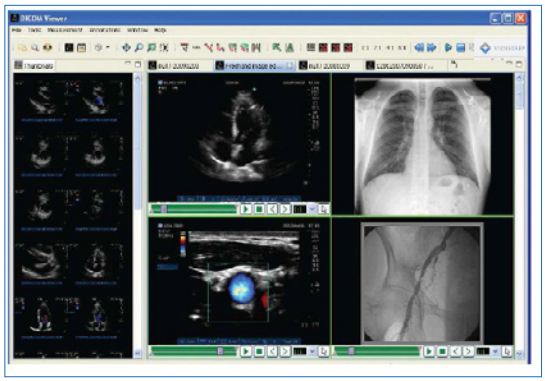
HITACHI
Inspire the Next

An easy to use and affordable solution for imaging and online reporting!

VidiStar offers cost-effective, medical imaging and clinical reporting technology for any size practice or hospital setting



VidiStar offers a multi-modality picture archiving and communications system (PACS) which interfaces with a range of diagnostic imaging systems in a cost-effective manner. VidiStar's Internet-based PACS and DICOM structured reporting solution uses the latest web-based technological standards for clinical interpretation, analysis, and medical reporting for physician office and hospital-based settings.



- Save time and increase accuracy with auto population of data from imaging modalities, comprehensive point and click reporting, electronic medical records interface capability
- Multiple Electronic Medical Record Report interfacing capabilities with electronic medical records via HL7, DSR or PDF
- "Point and Click" Reporting
- Interfaces with most existing imaging modalities
- Telemedicine capabilities for online, remote viewing of studies and to finalize reports
- Provide referring physicians with studies and reports instantly via fax, email or VidiStar's award-winning Referring Physician Portal
- Reporting Client is compatible with Windows 7, 8, 8.1, and 10; as well as MacOS Versions 10.10 and above
- View Client available on modern devices including Mac and iOS
